OBJECTIVE

Electrical and Computer Engineering Undergraduate at the University of Memphis, actively seeking experience and mentorship to enhance my skills in IoT development, as well as analog and digital circuit design. My primary interests include developing embedded systems and machine learning applications. I am committed to deepening my engineering proficiency through academic research, structured internships, and hands-on project involvement.

EDUCATION

BS

Electrical Engineering

Computer Engineering

May 2027

University of Memphis, Memphis, TN

RELEVANT WORK EXPERIENCE

Medical Records Specialist & IT Technician

June 2024 – June 2025

Kidney Care Center, Memphis, TN

- Updating and managing electronic medical records (EMR) while verifying insurance and collecting co-pays, demonstrating data integrity, and providing patient-focused service.
- Coordinating and scheduling patient appointments and front-desk operations, streamlining provider availability, reducing wait times, and showcasing organizational efficiency and multitasking.
- Gathering and reviewing patient vitals, medical histories, and administering physician-ordered treatments, highlighting clinical proficiency, attention to detail, and proactive problem-solving.
